Manufacturers, suppliers and others provide what you see here and we haven't checked it out. GSM UNLOCKED ATT TREK 2 HD 16GB Wi-Fi and 4G 8 ANDROID TABLET, Manufacturer refurbished This item is a store demo or overstock /customer trade in the carrier or store return to New Other state and fully functioning, Cosmetic 9.5 out of 10 conditions of the original retail box included iem has a good IMEI (has not been reported, lost or stolen)BrandUnknownManufacturer Part NumberSR-K88Perative systemAndroidManufacturerUnassignedCustomer AGet specific details about this product from customers who own it. So if you find the current lower price from the online store on an identical, stocked product, tell us and we will match it. For more information, see the online price match. Webapp affiliate \$150 ATT Trek 2 HD was the successor to Trek HD last year. This latest iteration of the carrier's exclusive tablet comes with some updated specifications and the latest Android software, although its 7.20p 8-inch display remains unchanged, and performance sometimes chugs along when multitasking. However, Trek 2 HD remains one of the most affordable LTE-connected slates you can buy, making it a good option if you need more than just a Wi-Fi connection. If you don't need LTE, however, the Nvidia Shield Tablet K1 (\$1,153.29 on Amazon) is the best tablet all around and a choice of our editors. For casual multimedia use, the low-cost Amazon Fire (\$49.99 on Amazon) is another top pick. The design, display and FeaturesTrek 2 HD may sound like the name of a durable device built for hiking and hiking, but the tablet is not waterproof or built to any specific standards Strength. However, it still feels pretty durable, with a solid polycarbonate build and a tenacious textured back panel. The tablet measures 8.5 by 4.9 by 0.4 inches (HWD) and weighs 12.8 ounces. It's about the same size as the shield K1 tablet (8.7 by 5.0 by 0.4 inches, 12.6 ounces), although the slender Samsung Galaxy Tab S2 8.0 8.0 At Dell Technologies) (7.8 at 5.3 by 0.2 inches, 9.6 ounces) makes them both look chunky. On the right side of the slate you'll find a power button and volume rocker, as well as a flap that covers the SIM and microSD slot cards (the latter worked well with the 200GB SanDisk card (\$46.25 on Amazon) in testing). Downstairs there is a USB-C charging port and a 3.5mm audio connector on top. Once again, given its name, you also expect Trek 2 HD to have a super-sharp display. But while the 8-inch, 1280 by 800 display is clear enough to read, browse the web and watch videos, this resolution only works up to 189 pixels per inch (ppi), so there's definitely some noticeable pixelation going on. Both the 1,920-on-1200 shield K1 tablets (283 ppi) and 2048 at 1536 Tab S2 (320 ppi) look noticeably sharper. On the other hand, there are loud front speakers above and below the display that produce powerful sound for video and games. The tablet supports LTE bands 1/2/4/5/7/12/29/30 on ATT. It showed solid network performance where I tested in midtown Manhattan, similar to what I saw on ATT phones like the LG G5 (629.99 For the latest plan and device price: 844-235-3939 on T-Mobile). It's somewhat rare to find data-enabled tablets in this price range, especially one that also supports dual-range Wi-Fi. The processor, battery, and CameraPowered by the octa-core processor qualcomm Snapdragon 617 clock 1.5 GHz, Trek 2 HD uses the same chipset you'll find on a lot of phones like the Motorola Moto G4 (on Amazon), but we haven't seen as often on tablets. It was 45,364 points on the Benchmark AnTuTu, which checks the overall performance of the system. That's a lot lower than the Snapdragon 650-powered Asus zenPad No8 (\$249.99 on Verizon Wireless) (66,898), and the K1 Shield tablet (73,626), which is powered by the ARM Cortex A15. See how we test tablet tablets also has 2GB of RAM, allowing it to handle most of the standard applications without difficulty, including Chrome, Gmail, Google Maps, Hangouts, and YouTube. However, switching between apps sometimes leads to stuttering. And games like GTA: San Andreas and Asphalt 8 are playable, but suffer from some delay. If the game is important to you, you will get a much higher performance on the K1 shield tablet. Battery life is solid. The tablet clocked 5 hours and 19 minutes of time while streaming full-screen LTE video at maximum brightness. That's almost an hour longer than the zenPad No8 (4 hours 30 minutes on LTE), though not until the Shield K1 tablet (6 hours, 13 minutes over Wi-Fi). You don't have to worry too much about the pill dying on you while traveling. There are matching 5-megapixel camera sensors on the front and back of the tablet. The images are mostly clear and sharp enough in well-lit conditions, but it's no wonder that no sensor Handle low light very well. Photos taken indoors tend to look dirty, and automatic exposure usually overcompensates to overcompensates washing or darkening the background. Both sensors can also record 1080p video, although it's not the smoothest. SoftwareThe Trek 2 comes with a version of Android 6.0.1 Marshmallow, which is pretty close to stock. There are some minor changes : you have to click and keep the lock screen instead of swipes, the shadow notifications are transparent, and there are some additional categories in the settings menu, but the overall look will be familiar to existing users. There are several viruses, including eight ATT apps, several Amazon apps, and several others. None of them can be removed, except for the WildTanget Games app, leaving you with only 8.72GB of available storage out of all 16GB. Fortunately, you can use the Adoptable Storage Marshmallow feature, which lets you treat the microSD card in the same way as integrated internal storage when it comes to downloaded apps, photos, and videos. ConclusionsIf you're looking for a cellular tablet for less than \$200, ATT Trek 2 HD is a solid option. It's certainly not a high-end device, but \$150 gets you pretty good performance, battery life, and network connectivity. The Asus zenPad No8 for Verizon (\$249.99 on Verizon Wireless) costs \$100 more, but gets you a faster performance and a sharper display. However, if you can go the wi-fi-only route (and use the phone as an access point), the Nvidia Shield K1 tablet is the best option. It gets a high-resolution display, long battery life and a powerful processor that stands out in games. And if you just want to watch videos and browse the web, you can't go wrong with \$50 Amazon Fire. See it \$150.00 on ATT Internet MSRP \$150.00 Plus Good Cellular Connection and two-band Wi-Fi. See more of the downsides of Limited Internal Storage. Trek 2 HD is well priced if unexciting, An Android tablet for ATT users who need built-in cellular connectivity.
